

Table of Contents

|01 High Level Comparison Oracle/Postgresql

|02 Architecture

- Database Cluster & Instance
- Process Comparison
- Functions of Postmaster
- Listener in Postgres?
- Memory Comparison

|03 Installation

|04 Working with PSQL

- Playing around with psql
- .pgpass
- .psqlrc

|05 Instance Management

- Startup Modes
- Shutdown Modes
- Reload

|06 Contents Of \$PGDATA & Config Files

- Folder Structure of PGDATA
- Control File
- Configuration Files
- Important Parameters – postgresql.conf
- Context of Parameter to determine Static/Dynamic Parameters
- Using tools for setting recommended parameters.
- pg_hba.conf

|07 Logical & Physical Structures

- Global Objects
- Tablespaces
- Temporary Tablespace
- Datafiles
- TOAST (The Oversized-Attribute Storage Technique)

|08 System Catalog

- System Catalog
- Corelation of Dictionary Views
- pg_catalog vs information_schema
- Functions

| 09 Concurrency Control

| 11 Extensions

- Top Extensions
- Installation and Managing Extensions

| 13 User Management

| 10 VACUUM

- VACUUM
- AUTOVACUUM
- Transaction ID Wrap Around
- Autovacuum parameters
- Understanding these parameters

| 12 PGADMIN

| 14 Backup & Recovery

- Understanding LSN, WAL Segments & WAL Logs
- Enable Archive Mode
- Database Crash Recovery
- Timelines (Incarnations)
- Logical Backups
- Physical Backup (pg_basebackup)
- Point in time Recovery

| 15 Patching & Upgrades

- Understanding Versioning
- Contacting Postgresql Community for help
- Minor version Upgrade
- Major Version Upgrade using pg_upgrade

| 17 High Availability

1. Comparison of HA options between Oracle & Postgres
2. Understanding Streaming Replication
3. Replication Slots
4. Replication Manager
5. PGBouncer
6. PGPool-II
7. Demo

| 16 Performance Tuning

- Comparison of Performance Tuning Options between Oracle & Postgres
- Different types of Indexes
- Partitions
- Understanding the Explain Plan
- Using Hints
- Using Hints without Changing Code
- Parallelism
- PGBadger
- Generating Oracle Style AWR reports using pg_profile

| 18 Database Maintenance

- Regular Administration & Maintenance Activities
- Managing Bloat
- Reindex
- Debugging
